Microsoft / Product Designer 3

Microsoft Edge Browser

Jun 2024 – Present,
Toronto, ON (Remote)

Audited 20+ Microsoft Edge UI components against the Fluent Design System, resolving cross-platform inconsistencies between Figma and production to streamline developer handoff.

Led the transition from hard-coded UI values to a scalable token-based system. Defining semantic tokens in Figma and code to ship deep-theming support directly to 10M+ Microsoft Edge users

Served as the core design systems deputy for cross-functional product teams, conducting spec reviews for 15+ features and enforcing UI/UX consistency across all projects.

Crafting Inc. / Product Designer

SaaS Cloud Development Environments

Nov 2021 – Jun 2024,
Palo Alto, CA (Remote)

Served as sole product designer across SaaS cloud platforms—partnering directly with the CEO, PMs, and engineering leads to define technical requirements, refine architecture, and shape overall product strategy.

Redesigned and optimized main marketing website in Figma with interactive visuals, directly writing production updates in React to boost user engagement and streamline site architecture.

Waterloop / UI UX Designer

Pioneering Hyperloop Innovation

Jan 2021 – Apr 2022,
Waterloo, ON

Designed 3 interactive dashboards and web interfaces for Hyperloop projects to enhance usability for engineering and operations teams, while developing streamlined internal features that optimized hiring processes and boosted team efficiency.

OICR / Frontend Developer

Collaborative Cancer Research Institute

May 2021 – Aug 2021,
Toronto, ON

Revamped Dockstore using Angular, HTML, and CSS based on InVision mockups, creating a modern UI while optimizing site structure and navigation to improve responsiveness, usability, and overall user experience.

Enzuzo Inc. / UI/UX Designer

Data Privacy Compliance for Businesses

Sep 2020 – Dec 2020,
Waterloo, ON

Collaborated with the CEO to design and prototype a web application in Figma, translating business goals into functional UX while aligning design objectives for a cohesive user experience.

VirtaMove / Software Developer

Enhance Server Application Migration to Cloud/Datacenter

Jan 2020 – Mar 2020,
Kanata, ON

Developed C++ and Python tools for remote system data retrieval and analysis, streamlining workflow and reporting.

University of Waterloo

Sep 2018 – Apr 2023

Bachelor of Applied Science,
Biomedical Engineering
